

1. What does diversity, equity, inclusion and Indigeneity (DEII) mean to you?
DEII means to me, fairness, access, equality. Everyone to feel welcome, included, and embracing and encouraging differences.

2. What have you done personally or professionally to develop your own understanding of anti-racism?
I keep myself educated and informed.

3. What DEII, anti-oppression and/or cultural competence training have you received and how will you apply what you learned as a councillor/trustee?
I have not received any official training, though I am open and interested in official training. I keep myself educated through different platforms such as articles, books, open discussion, etc. If elected councillor I will be sure to listen and understand all voices, I will ensure every resident feels heard and included.

4. How will you work to ensure that every resident in our community is included?
How will you work to ensure that every student and staff member is included?
If elected as councillor I plan to attend any open community group meetings, enable local engagement, make myself available to every single resident, make sure to represent local voices, including speaking up for any group or person who feels unheard.

I will understand my ward, get to know everyone in the community and listen to everyone's voice.
